

puzzled that they did not show the book to you. Why did they ask me who I wanted to see it, if they had no intention of granting my requests? I also mentioned Patsy Smith and a Kansas conservationist. I had a recent cryptic note from Don saying they had a "third well-qualified reader." *(So I have heard something, Correction)*

Thank you, especially, for the rundown on your activities. Of course you are a "humanist" in the better definition of the word. I am amused and gratified that the brouhaha about TCC has really set you up on a pedestal. You are in demand everywhere and must meet yourself coming and going. We are proud of you but would like to humbly ask you to take care of yourself. I'm glad Rosa has retired and has more time to collaborate. Your Aleutians projects interest me no end. Could Rosa also go on the fishing boat that works with the Russian tender?

And, yes, I liked the NORTHWEST EXPERIENCE II, and I thought Bruce's piece was the best bit in the book. I look forward to the whole. I'm not familiar with <sup>the</sup> Northwest Perspectives.

I am both amazed and pleased over Lane's avid interest in farming and livestock raising, as evidenced in ~~her~~ three or four notes to me during N.W. Exp. I hope all goes well with "Mom," and I am more than pleased to see the young respect the soil from which we draw our sustenance.

Thanks much for writing me.

Love from Hazel, the Long-Winded Lady,  
and from Earle, who is bearing up admirably,

*Hazel*
