1993

Dear Rosa and Murray:

Enclosed: Most recent schedule. This one was done without our knowlwdge ,for county council and pilot convenience. We all screamed "UNFAIR" because those are the two boats we all use most for going over and coming back. This time they listened, and have promised to go back to old schedule. Of course the "printer is out of order" and there will be a delay in new winter schedule. The battle we lost is that they are keeping the summer surcharge, for late week-end runs, on, even for us old fogies who never ride them. With a "promised" raise in rates when big 54-car boat, built for Island, including McNeil and Ketron, comes on, next year or the next, maybe. A native young woman told me they plan to hire our genius electrician to make and plant a time bomb aboard for initial test run.

Watch for headlines in the Bugle and all over!

Twass a treat to talk to you both .

Love,

Hazel
